Earth is our home. It is the only known planet in our universe coded with such diversity of beautiful life forms. On retreat, we will *waste time* in the wondrous natural environment of Pyramid Lake listening to the breezes in the towering pines; experience star light on the lake at night; listen to the alluring and haunting loons singing to us on the water; be awed by the colors of the dawn filtering through the morning mist. Drawing from poets, mystics, musicians, scientists, naturalists writings, we will study our humble relationship to the rest of the earth community. Come! Pause! Pray! Play! Leave, refreshed in spirit and soul.
